

If students forget their network password, you can reset it for them by following the instructions below.

- Log into your SV Portal
- Search for the student in the “Student Search” textbox

- Click “Reset Student Password” in the lower right corner

This resets their password. Give the student their new password. If they would like to change their password, once they have successfully signed into their computer, they can press ctrl+alt+del and choose the “Change a Password” option.
