

4th to 5th GRADE SUMMER LEARNING TIPS

READ, READ, READ

Summer reading should be FUN reading! Help your child read ANYTHING & EVERYTHING that interests them. Encourage your child to create a schedule for daily reading. Many local libraries and book stores have different summer reading programs that can keep kids interested. Log onto COMPASS / EPIC Books / RAZ Kids.

Scan the QR Code for a summer packet that you can do every day that will keep you thinking, learning, and reviewing everything you've done all year.

Have fun with numbers

Find fun and creative ways to practice math. There are so many FREE websites/apps to keep your math mind strong over the summer.

Experiment! Do Science!

Watch an ice cube melt. Plant a garden. Play with magnets. Collect rocks. Collect leaves. Summer is a great time to experiment!

Make Art! "Every child is an artist." ~Picasso

Kids love art projects, but rarely have enough time during the school year to draw, paint & construct as much as they like.

If you don't use it...you'll lose it!
